

Task 1: Category Performance

Analysis Business Need:

Management wants to know which product categories generate the highest revenue.

Task:

Create a visualization to compare total Sales by Category and identify the top-performing category.

Sheet 1

Task 2: Sales Trend Analysis

Business Need:

The leadership team wants to understand how sales fluctuate over time to plan promotions and inventory.

Task:

Analyze Sales trends over time (monthly) to identify peak and slow periods.

Task 3: Regional Contribution Analysis

Business Need:

The regional managers want clarity on how much each region contributes to overall sales.

Task:

Visualize Region-wise Sales contribution and identify the highest contributing region.

Task 4: Profitability Investigation

Business Need: The finance team suspects that some high-sales orders may be reducing overall profit.

Task:

Analyze the relationship between Sales and Profit to identify loss-making or low-profit orders.

Sheet 4

Task 5: Business Growth Evaluation

Business Need:

Senior management wants to assess whether the business is growing consistently.

Task:

Visualize cumulative Sales growth over time to evaluate overall performance.

Sheet 5

Task 6: Category vs Region Performance

Business Need:

Operations wants to know which regions perform well for each product category.

Task:

Compare Category-wise Sales across Regions to identify strong and weak market areas.

Sheet 6

Category	Region			
	Central	East	South	West
Furniture	 100,032	 76,358	 90,071	 87,177
Office Supplies	 89,887	 77,971	 75,782	 85,620
Technology	 76,565	 87,696	 85,025	 114,990

Task 7: Product Prioritization

Business Need:

The product team wants to focus on products that create maximum business impact.

Task:

Perform a multi-dimensional analysis using Sales, Profit, and Quantity to identify priority products.

Sheet 7

Task 8: Executive Dashboard Creation

Business Need:

The CEO wants a single view dashboard that summarizes key insights.

Task:

Create an interactive dashboard combining at least three visualizations and apply filters such as Region or Category.

Sheet 2

Sheet 3

Sheet 4

9. Chart Selection Justification Explain why different charts were used for different business questions in this analysis.

→ The choice of charts is driven by the specific nature of the business question being asked:

- **Bar Charts** were used for **Category Performance** because they are the most effective for comparing discrete variables (categories) side-by-side.
- **Line Charts** were selected for **Sales Trends** because they clearly visualize the movement of a measure over a continuous time axis.
- **Heatmaps** were used for **Cross-Category Analysis** because color-coding large grids of data makes it easier to spot "hot" and "cold" performance areas across two dimensions.
- **Scatter Plots** were chosen for **Profitability** because they show the relationship between two different numerical variables, making outliers (losses) immediately visible.

10. Business Insight Summary Summarize two key insights from your dashboard and explain how they can help management make better decisions.

1. **Profitability Leakage in High-Sales Orders:** The scatter plot revealed that a significant number of high-revenue orders are currently loss-making.
 - **Management Action:** The operations team should review the discount structures and shipping costs associated with high-value orders to ensure that volume isn't being chased at the expense of the bottom line.
2. **Product Hierarchy Strategy:** **Phones** are the "powerhouse" of the business, leading in sales, profit, and quantity. Conversely, **Furniture in the East** is a major under-performer.
 - **Management Action:** Management should "double down" on the Phone category with inventory priority while investigating if the poor Furniture performance in the East is due to high local competition or a lack of marketing presence.

This structured approach transforms raw data into a strategic roadmap, helping the company improve regional efficiency and overall profitability.
